

## ***Ten Second Bracket and Bumper Technical Specification***

### Technical Specification

- a. Front Bumper (Add this to existing Spec)
  - i. The bumper shall include a bicycle rack attachment feature consisting of two rectangular ports and two threaded inserts that will be compatible with a bicycle rack bracket that uses two notched latch bars, two standoff tubes and two hand knob threaded fasteners. This system must allow quick removal of the bicycle rack and bracket without the use of tools. Once removed the bumper will satisfy the 5-mph requirement.
- b. Bicycle Rack (Add this to existing Spec)
  - i. The bicycle rack shall include a bumper attachment feature consisting of two notched latch bars, two standoff tubes and two hand knob threaded fasteners that are compatible with two rectangular ports and two threaded inserts existing in the front bumper. This system must allow quick removal of the bicycle rack and bracket without the use of tools.
